

Dear Parents,

Our class will be using a computer-based program for additional support in our classroom. We will be learning how to log-on and access the world wide web to use a program called SkillsTutor. This program supports math, reading and writing instruction. Teachers are able to assign activities to students and because skills Tutor is web-based, you can access it anywhere that you can get on line.

HOW TO LOG IN

1. Internet Explorer (or your favorite web browser)
2. Go to www.nomeschools.com
3. Click on Skills Alaska button at the top the screen.

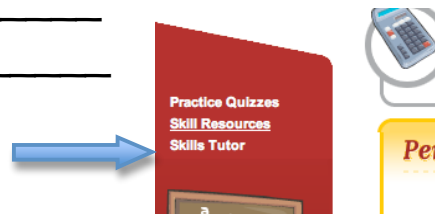

4. This will give you a screen asking for you to sign in. Here is the information specific to your child.

username: _____

password: _____

5. Then select the "Skills Tutor" link on the left side of the screen.

6. Select an assignment. These are assignments that are selected specifically for your child. Then have your child begin at the top by selecting the recommended activity in the red box. It starts with a pretest and assigns activities based on the results. The activities require the kids to have 80% correct before it lets them move forward.

7. Log out when finished!

Please save this information for future home use.

Thank you!
